

WATER GARDEN PLANTS

DO NOT RELEASE
any plants or animals to lakes or streams

This plant may be
INVASIVE
if it reaches lakes or streams

DO YOUR PART—
Keep this plant contained in your water garden.

WATER GARDEN PLANTS

DO NOT RELEASE

Invasive plants and animals threaten the ecological balance of our natural waters.

*While not all exotic plants are cold-hardy in our climate zone, some are **invasive** and will cause serious problems if they reach our lakes, streams, ponds, or wetlands.*
