

YOU CAN HELP PROTECT OUR ENVIRONMENT

- **NEVER TRANSPLANT NON-NATIVE PLANTS** into lakes, streams, wetlands or stormwater ponds.
- **CHECK YOUR PLANT ORDERS** for unwanted, and potentially invasive, hitchhikers (seeds, plant fragments, snails, insects, or fish).
- **BE AWARE OF THE REGULATIONS** regarding possession, transport, or sale of non-native plants and animals.
- **LEARN HOW INVASIVE PLANTS SPREAD** - by seed, rhizome, or even tiny plant fragments.
- **RECOGNIZE** which plants and fish are potentially invasive in our climate zone.
- **PROPERLY COMPOST OR DISPOSE OF** unwanted plants or fish.

WATER GARDEN PLANTS

Invasive plants and animals threaten the ecological balance of our natural waters.

While not all exotic plants are cold-hardy in our climate zone, some are **invasive** and will cause serious problems if they reach our lakes, streams, ponds, or wetlands.

**DO YOUR PART—
KEEP THEM CONTAINED
IN YOUR WATER GARDEN**
